WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

***** Marginal "High Risk" conditions for the Sacramento Valley/Foothills today then "High Risk" will return late tonight over more of the Geographic Area and last into early Saturday evening, all for Low relative humidity (RH) with windy conditions. *****

Our weather pattern will continue to support more periods of strong N to NE wind and low RH (day and night) into Saturday evening. Winds will be a bit lighter today in the Sacramento Valley and quite a bit quieter elsewhere than yesterday. The winds will pick up again later tonight and be strongest early Saturday, so "High Risk" for Significant Fire Potential has been designated for the Sacramento Valley/Foothills (NC05) today into Saturday evening, and later tonight through Saturday evening for the Mid Coast to Mendocino (NC02), Bay Marine (NC03A), Diablo-Santa Cruz Mountains (NC03B), and the far western portion of the Northern Sierra (NC07). Peak gusts are expected to be 40 to 50 mph late tonight locally stronger gusts possible in the most wind prone areas.

A high pressure ridge will take over our weather pattern by late Sunday and the air mass over the North Ops region will be very dry everywhere with widespread low afternoon RH (8-18%) and poor to moderate (20-50%) recoveries overnight. Winds will be quite light. A low pressure trough will likely arrive over the West Coast later next week, but how much precipitation may come along with that is very uncertain at this time. However, it appears there will be a chance of at least some rain over the northern and eastern mountains.

SOUTHERN CALIFORNIA

*****Gusty north winds across Santa Barbara County and the Grapevine tonight*****

*****Strong offshore winds across Southern California Saturday morning through Sunday morning*****

*****Very warm and dry Saturday through Monday*****

The back side of a Pacific trough will bring near normal temperatures to much of the area today, with 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. A ridge of high pressure moving northward from Mexico will bring significant warming Saturday through Monday. Most valley locations across Southern California will receive maximum temperatures in the 90s during this time. Minimum humidity will be mainly in the single digits and teens across the region through Monday. North winds of 15 to 25 mph with gusts to 40 mph will surface across much of Santa Barbara County and the Grapevine tonight. Winds will become northeast 20 to 30 mph with gusts to 50 mph across the mountains and below the canyons and passes of Southern California Saturday morning and continue through Sunday morning. Winds will become light Sunday night and Monday. The ridge over California will weaken and a Pacific trough will drop down the West Coast bringing a gradual cooling trend and increase in humidity Tuesday through the end of next week. There will be gusty westerly winds across the mountains and deserts Tuesday through the end of next week.
