WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Moderately strong, gusty westerly winds developing many areas Monday afternoon, plus areas of rather low RH east of the Cascade/Sierra crest. Today will be in between weather systems with partly cloudy to sunny skies. The next in a series of little weather systems expected to move across the North Ops region this week will approach the coast later today. No precipitation is expected until later tonight when some light rain will probably move ashore in the far NW. Monday through Friday will see periods of cloudiness and light precipitation at times in some areas of the region. Precipitation amounts will generally be quite light, and most of it will fall north of a line from around Cape Mendocino to near Alturas. South of that line, most of any precipitation will fall over the mountains. The chance of precipitation over the Sierra looks best Monday night with maybe another moderate chance later in the week. The snow level could drop to about 6000-6500 ft in our far northern areas each night Monday through Wednesday but be more like 7000-7500 ft during the day. Friday into next weekend higher pressure is expected to return to the region with warmer temperatures and a chance of some moderately strong, gusty N to NE winds developing. Some gusty westerly winds will develop in many areas Monday, but they will be strongest near and east of the Cascade/Sierra crest eastward. Local gusts around 30-35 mph are expected. Afternoon min RH values could drop to around 15% or a little lower locally during the windy period Monday as well. Aside from that, RH will generally be higher in all areas this week with overnight RH recovery quite good overall. Temperatures will be 10-15 degrees below seasonal normals Wednesday and Thursday with afternoon highs in the warmest inland valleys in the low and mid 70s those days.

SOUTHERN CALIFORNIA

There will be little change in temperature through Tuesday as a weak trough remains over the West Coast. Maximum temperatures will be in the mid 60s to mid 70s across the mountains and upper 70s and 80s in the valleys. A Cooling trend will occur Wednesday through the end of this week as the trough over the West Coast deepens. Temperatures will be well below normal Thursday and Friday. Scattered showers with light rainfall totals will be possible over the Sierra and over Southern California Wednesday night through Friday afternoon. Minimum humidity will remain above 20% away from the deserts through the end of this week. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert locations Monday afternoon through Thursday afternoon. Northerly winds of 20 to 30 mph with gusts to 50 mph will surface across Santa Barbara County and the Grapevine Thursday and Friday nights. A ridge of high pressure will approach the West Coast from the Pacific causing warming and drying next weekend. Gusty offshore winds will be possible across Southern California next weekend.

Cal OES LAW ENFORCEMENT MISSIONS

Closed Cal OES Law Missions

- **2017-LAW-38863, 09/16/17 at 1445 Hours,** the International Emergency Coordination Center (IERCC) notified the California State Warning Center (CSWC) of a SPOT activation within Calaveras County. LDO coordinated with IERCC and Calaveras County SO (CCSO) for search efforts. CCSO arrived on scene, located a subject injured from a dirt bike accident. Subject was transported to a local hospital for treatment. **Mission Closed**

- **2017-LAW-38867, 09/16/17 at 1602 Hours,** Madera County Sheriffs' Office advised a hiker (H1) reported contacting a male subject hiking (H2) the John Muir Trail during the morning hours. H1 advised H2 was diabetic, had slurred speech, seemed disoriented and was drooling. Madera SO requested a high altitude medevac helicopter with night time capabilities for this mission. LDO secured an HH 60 helicopter from AFRCC. Point Last Seen was approximated to 37.7151 degrees N by 119.1509 degrees W, adjacent to Garnet Lake. Madera SO personnel (used as spotters) flew the mission with CNG aviation personnel. They were unable to locate the subject. At 2000 hours Madera SO requested a morning helicopter transport into the area to drop off a ground team. LDO began working the mission and was later notified by Madera SO to cancel the helicopter resource. **Mission Closed**
