SITUATION SUMMARY

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

The National Hurricane Center has forecast the Hurricane Dolores system pushing off the west-northwest going into the weekend, though it looks to stay well west of Baja. This track is significant and could bring tropical moisture mainly into the southern half of the state late this weekend and into early next week, with the potential for flash flooding, mainly in the deserts of eastern San Bernardino County and the southern Sierra. Central California could see some impacts from this, with some increased monsoonal moisture moving into the area, though this will be focused more toward the Sierras and Kern County.

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:
Stratus and perhaps fog will increase at the coast for the next several days as strong northerly winds over the coastal waters slacken up and go southerly. Seasonably warm weather conditions will persist in the interior through the weekend as a ridge aloft over the northeast Pacific extends toward the coast.

Medford Weather:
The near-term forecast can be characterized as warming and drying, with temperatures generally 5 to 10 degrees above normal Saturday and Sunday, and thunderstorm chances very slim and limited to eastern Siskiyou, Modoc, and southern Lake Counties. The forecast area can then expect lower temperatures and dry conditions until an upper trough nears the region by the middle of next week, bringing a slight chance of showers and thunderstorms.

Reno Weather:
Low pressure from the Pacific Northwest will gradually increase the thunderstorm threat into tonight with near normal temperatures. After a brief break, there is the potential for a cooler and wetter weather pattern for the start of next week.

San Francisco Weather:
Cooler temperatures are expected today and Saturday as an upper level trough from the Great Basin extends into the district. Monsoonal moisture will move into Southern California Saturday and Sunday bringing a slight chance of precipitation to the southern part of the district. Moisture from Hurricane Dolores may bring another chance for precipitation Monday. Warmer and more humid conditions are expected Sunday and Monday.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:
A slight cooling is expected today and then temperatures will go down to normal this weekend. Near or below normal daytime temperatures forecast for next week. Tropical moisture from Hurricane Dolores may bring a threat of showers early next week, mainly in the mountains.

Hanford Weather:
A few isolated afternoon showers and thunderstorms will be possible along the southern Sierra Nevada Crest today. Otherwise, sunny skies will prevail with a slight warming trend. Tropical moisture may arrive Saturday and bring a threat of showers and thunderstorms spreading north across the region over the weekend and into early next week.

SOUTHERN CALIFORNIA:

Los Angeles Weather:
Remnants of Dolores will pass by to our west over the weekend, bringing with it increasing humidity and cloud cover with the slight chance of thunderstorms across the area through Monday. A cooling and drying trend will start Tuesday.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:
Areas of night and morning coastal low clouds and patchy fog will continue through late tonight with dry southwest flow aloft today. An influx of tropical moisture from the south beginning late tonight will bring a chance of showers and thunderstorms through the weekend, with a chance of afternoon and early evening thunderstorms continuing for the mountains and deserts for Monday. For Tuesday through Friday, a developing trough of low pressure along the West Coast will bring a return of dry southwest flow aloft and onshore lower level with a return of night and morning low clouds and patchy fog for coastal areas.

Southeast California Weather:
Showers and thunderstorms will become more common across the region today through the weekend as tropical moisture associated with Hurricane Dolores moves into the Desert Southwest. This will also result in cloudy skies and below normal temperatures this weekend. Somewhat drier air will move into the region early next week.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC, Inland, Coastal, and Southern REOCs and the Santa Barbara County EOC are activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf
- Cal OES Recovery/Individual Assistance provided 1,000 copies of the 2015 Drought Brochure to DWR for distribution at the State Fair beginning Friday, July 10, 2015.
- Cal OES Regions (Inland, Coastal, Southern) will consolidate and have one collective OA drought call Monday's at 1100 hours beginning 07/06/15 facilitated by the SOC.
