Service Interruptions:

Cell Service Interruption, Humboldt, Napa, Sonoma, Siskiyou and Mendocino Counties

- On 10/09/17 at 1543 hours, Cal OES 9-1-1 Branch advised that 73 Cell Towers and a microwave hub in Napa, Sonoma, Siskiyou, Mendocino and Humboldt counties are non-operational due to wildfires in the area. Currently 3G and 4G networks are unable to dial 911 with their cell phones.
- The California Highway Patrol, Cal OES and AT&T are currently coordinating deployment of COWs (Cell Phone On Wheels) to get coverage in those affected areas.
- Time of service restoration is unknown.

On 10/12/17 at 0906 hours, Cal OES 9-1-1 Branch advised that AT&T Mobility has 9 remaining sites down, they are bringing them back on line as quickly as possible, but reports show 3 sites were destroyed and will not be brought back up in the immediate future. They have continued to rotate COWs to areas with poor coverage as sites are brought back on line. Currently deployed in Calistoga (1) and Santa Rosa (2).

Remote/Community Isolations:

Community of Dobbins, Yuba County

On 10/10/17 at 1829 hours, the Cal OES 9-1-1 Branch advised that AT&T has reported a community isolation in an unincorporated area of Yuba County from the North Yuba central office.

- 1,051 lines are unable to dial 911. This is affecting landlines only.
- Yuba County Sherriff's Office is the serving PSAP. They are still answering calls and have been notified of the situation.

As of 10/12/17 at 0906 hours, Cal OES 9-1-1 Branch advised AT&T repair crews are on site at the North Yuba Central Office installing new fiber. The 911 trunks to the remote central office are testing fine; AT&T is not able to access the office remotely to make a test call. Pending a technician dispatch to make a test call from the Central Office. The outage should be resolved and back online within the next few hours.

Community of Dobbins, Yuba County

On 10/10/17 at 1829 hours, the Cal OES 9-1-1 Branch advised that AT&T has reported a community isolation in an unincorporated area of Yuba County from the North Yuba central office.

- 1,051 lines are unable to dial 911. This is affecting landlines only.
- Yuba County Sherriff's Office is the serving PSAP. They are still answering calls and have been notified of the situation.

As of 10/11/17 at 1303 hours, AT&T repair crews are on site at the North Yuba Central Office installing new fiber.

- ETTR: Morning of 10/12/17

Community of Willits, Mendocino County Isolation

On 10/09/17 at 1136 hours, Cal OES 9-1-1 Branch advised that AT&T is reporting of a community isolation in Willits, Mendocino County.

- Unknown amount of residents have been impacted due to wildfire activity which has damage local transport and infrastructure
- As of 1452 hours, AT&T advises that the outage is affecting 5,084 customers.
- Mendocino Sheriffs Office is unaffected by the isolation and are operational.

On 10/10/17 at 0939 hours, Cal OES 9-1-1 Branch advised the suspected problem was due to a wildfire. The wildfire has destroyed infrastructure that provides cellular service to cell towers throughout the affected counties. Residents served by these towers have limited or no ability to dial 9-1-1 from their cell phones, depending on density of coverage in their respective areas.

- Willits PD and Cal Fire (Howard Forest ECC) have rerouted calls to Mendocino SO, CHP Humboldt has rerouted calls to CHP Ukiah, Pleasant Hill PD has rerouted calls to Contra Costa SO. All reroutes are in place due to fire damaged network/danger. All other PSAPs are taking calls as normal.
- Time to Resolution/Restoration: AT&T Mobility has multiple sites down. The exact number is unknown at this time. 73 were reported down yesterday (10/09/17), but AT&T has reported that several of those have been brought back on line. Cell On Wheels (COW) have been deployed to Willits, Santa Rosa, and Napa. Currently no estimated time to restore (ETTR).
- Verizon Wireless reports 41 cell sites are currently down, techs are working to repair, but there is currently no ETTR.

On 10/11/17 at 0939, Cal OES 9-1-1 Branch reported that the outage was due to transport failure at the Willits Central Office. 5,084 lines are unable to dial 911. There is currently no ETTR.

- On 10/11/17 at 1303 hours, technicians were dispatched to the Willits Central Office to test equipment and diagnose for repair.

As of 10/11/17 at 1500 hours, the outage was resolved. The outage was duet to a transfer failure at the Willits Central Office. Calls are now routing successfully.

WEATHER OF CONCERN

Weather of Concern

- Critical Fire Weather conditions are becoming more likely Thursday night through Saturday morning across the mountains of Los Angeles and Ventura counties, as well as the Santa Barbara County mountains and south coast. These areas are under a Red Flag Warning during this time due to the north winds gusting between 30 and 45 mph, coupled with very dry conditions (humidities lowering to between 5 and 15 percent) and very dry fuels.

Active Weather Warnings, Watches and Advisories by County:

- https://alerts-v2.weather.gov/counties/CA

Cal OES
GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** “High Risk” conditions for N to NE wind event and low Relative Humidity (RH) through Sunday morning for portions of Northern California***

*** Unusually dry air mass will affect the Geographic Area Sunday through early next week ***

Periods of strong N to NE wind, coupled with single digit daytime humidity and generally poor overnight recoveries will affect northern California through Sunday morning. The strongest wind period will be this morning and once again Friday night through Saturday night. A “High Risk” for Significant Fire Potential has been designated for the Sacramento Valley/Foothills (NC05) PSA today through Sunday morning due to strong northerly wind and low RH. The weather models have come in a bit stronger for a true offshore event this weekend so the risk has climbed for additional areas found across the Geographical Area. Therefore, Mid Coast to Mendocino (NC02), Bay Marine (NC03A), Diablo-Santa Cruz Mtns (NC03B) are included in the "High Risk" area. Peak gusts between 40 to 50 mph, and perhaps locally higher, are possible in wind prone areas. The strongest winds should favor Saturday to Saturday night period.

Wind speeds should gradually lower as the day progresses on Sunday and remain on the lighter side Monday. Very low humidity and above normal temperatures are expected Sunday and Monday and potentially last into Tuesday. An approaching trough should increase S to SW winds by the middle of next week.

SOUTHERN CALIFORNIA

Gusty north winds Santa Barbara County, I-5 Corridor next two nights

Offshore winds, very warm temperatures, low RH this weekend

A trough diving into the northern Rockies and Great Basin will generate gusty winds, warm temperatures and low RH over the next few days. Today, northwest winds of 15-25 mph will develop this afternoon along the central coast and the Kern County Mountains. An increasing northerly pressure gradient will, in turn, lead to gusty north winds of 15-30 mph in southern Santa Barbara County and the I-5 Corridor into the Santa Clarita Valley and adjacent mountain areas tonight into Friday morning. Local RH recovery will be poor in Santa Barbara County and higher elevations of the eastern Angeles N.F. tonight and again Friday night. There may be a lull in winds Friday afternoon, but the winds will ramp back up in these areas Friday night into Saturday morning. Afterward, the winds will transition to the northeast through the day Saturday which will favor Ventura and northern Los Angeles County. By Saturday afternoon or evening, northeast winds of 20-30 mph with gusts to 40 mph can be expected. The winds will likely peak in strength Saturday night through noon Sunday before slowly subsiding Sunday afternoon and evening. Minimum RH will fall into the 5-10% range over a wide section of Southern California below 7,000 feet. Temperatures west of the mountains will climb toward 90 degrees all the way to the coast Saturday through Monday. A return of onshore flow may lead to cooler and more humid weather beginning next Tuesday.
