SITUATION SUMMARY

California Department of Public Health Influenza Update

- California continues to see high levels of influenza or influenza-like illness (ILI) hospitalization above expected levels. While influenza activity varies from year to year and is unpredictable, California generally sees an increase in cases in late December or early January and it often peaks in February or March. During Week 1 (January 1 through January 6, 2017) of this year, increases in influenza-associated deaths in people under 65 were reported in multiple regions statewide. In Week 1, there were 5 deaths, for people under the age of 65, associated with influenza. The Hemagglutinin 3 and Neuraminidase 2 (H3N2) strain appears to be the predominant strain so far this flu season and this is contained in the current flu vaccine.

- The Medical and Health Coordination Center (MHCC) continues to remain activated as of 8:00 AM on January 13, 2017 in response to an increase in ILI and medical surge occurring throughout California. The MHCC will distribute a Public Health and Medical (Emergency Function 8) Situation Report related to influenza on Wednesdays of every week.

- The MHCC has received three local situation reports from Lake, Santa Clara, and Sonoma operational areas. There are no resource requests or significant impacts requiring further assistance at this time.

- Please see attached for full situational report.

WEATHER OF CONCERN

Weather of Concern

- Showers will continue today with the most instability and possible thunderstorms over the Sacramento Valley.
- A Winter Storm will effect mountainous areas of Central California bringing snow levels between 4,500 and 5,000 feet.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

The first in a series of Pacific storms will exit the region later today. Cool, wet, unstable conditions remain in place this morning, and widespread showers can be expected in the mountains. Lower elevations will see scattered to isolated showers. Isolated thunderstorms are also possible just about anywhere in the region today. Snow levels are near 3000 in the north and 5000 feet in the south. The next storm will arrive early Friday with southerly gusts 30-50 mph and snow levels near 4000-5000 feet in moderate to heavy precipitations. Snow levels will drop Friday afternoon to 2500-4000 feet once the front moves through. Scattered showers will continue Saturday in the colder air mass. The third storm will move arrive early Sunday with moderate to heavy precipitation. Southerly gusts may reach 40-60 mph and snow levels will start out around 4000-6000 feet. Once the cold front moves through Sunday afternoon snow levels will drop to 3000-5000 feet. Monday will be another day with scattered showers and snow levels near 2000-3000 feet. The final showers will end early Tuesday. The problem of soft, saturated soils will continue to make downed trees possible. Area water courses will again run rather high as well. At this time it looks like a stretch of mild and dry weather with occasional offshore winds will begin by late Tuesday and last until early February.

SOUTHERN CALIFORNIA

Scattered showers will move over the region today as one storm moves off to the east and another storm approaches the coast. This next storm will bring periods of heavy rain Friday. Isolated showers will occur Saturday before the last in this series of storms affects the area Sunday and Monday with periods of heavy rain. The back side of this last storm will bring scattered showers to most of the region Tuesday. An additional 5 to 10 inches of rainfall will occur across the foothills and mountains and 2 to 5 additional inches of rainfall will occur across the coast and valleys. The snow level will remain mainly between 4,000 and 5,000 feet through early next week. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas through Monday night. Temperatures will be around 10 degrees below normal through early next week, with mid 30s to mid 40s across the mountains and upper 40s and 50s in the valleys. A ridge of high pressure will build into California from the Pacific Ocean bringing a warming and drying trend starting Wednesday. There will also be periods of strong and gusty offshore winds across the mountains and below the canyons and passes of Southern California starting Wednesday morning.

CAL OES LAW ENFORCEMENT MISSIONS

New Cal OES Law Missions

- **2017-LAW-29662 1/17/17, 1000 hours,** Santa Barbara SO requesting HRD K9 assistance on behalf of Santa Barbara PD, to search an undisclosed residence for possible human remains from a 20 year old homicide. The California Specialized Search Team (CSST) out of Santa Clara County accepted the mission and will send two Historical HRD K9 Teams. The search will take place on Wednesday, 01/25/17. The Cal OES Law Branch is coordinating this mission. **Mission Ongoing.**

- **2017-LAW-29679 1/18/17,** Sacramento County Sheriff's Department is requesting assistance recovering a vehicle and victim of an accident between Isleton and the Isleton Bridge. This incident occurred last Sunday but conditions have prevented teams from retrieving the vehicle and victim. The vehicle is 40 feet off the levee in 17'-20' of water, overturned on a flat surface. The Solano County Sheriff's Department accepted the mutual aid mission. The search and recovery will take place Saturday, 01/21/17. **Mission Ongoing.**

Closed Cal OES Law Missions

- **2017-LAW-29666 1/17/17, 1453 hours,** The Kern County Sheriff's Department requested assistance regarding a possible overdue aircraft out of Tehachapi. Originally it was thought the aircraft flew from Tehachapi to Torrance and then to Whiteman Airport in LA County last Wednesday but updated radar tracking and fuel receipts revealed the pilot returned to Tehachapi on Wednesday evening (1/11), refueled on Thursday morning (1/12) and departed Tehachapi for his daily flight to Torrance. It is not known if anyone else was on board. Radar tracks disappeared sometime after 0900 hrs on 1/12. Kern SO notified FAA which prompted the AFRCC to issue an alert notification (ALNOT) under mission number 17M0036A . The aircraft is a 1978 Mooney M20J, a fixed wing, single engine 4 seater, registered out of Topanga. The local police department checked the R/O's residence without success. Ramp checks had been done earlier at all 3 destination airports (Tehachapi, Torrance and Whiteman Airports) with negative results. The W/C issued a CLETS message to Kern, LA and San Bernardino Counties. The California Wing of the Civil Air Patrol was activated. They continue to search this morning. **Update: 1/18/17, 0856 hours,** CAP advised their ground team had located the wreckage (verified thru the tail number) near Mt. Hughes, L.A. County with no confirmation on any remains located. Los Angeles Sheriffs Department (LASD) and AFRCC advised that CAP was securing the scene and awaiting LASD. 1400 hrs., CAP ground team demobilizing. One deceased located in the wreckage. **Mission Closed.**
