Cal OES Coastal Region

Tres Pinos / Ridgemark Area Earthquakes, San Benito County

On 07/17/16 at 2226 hours the California State Warning Center (CSWC) observed:

- 10 earthquakes mostly under 3.0 magnitude at 2226 Hours
- Two that were at or above 3.5 magnitude
- At 2253 hours 3.8 magnitude
- At 2301 hours: 3.5 magnitude
- Also a 3.7 that occurred 17 miles Northeast of Hollister, San Benito County at 0227 hours (Different Fault)
- Per the Northern California Duty Seismologist for USGS, he reported that there is no heightened concern from their standpoint. It appears that the smaller EQs on two separate fault lines are a coincidence
- USGS and the Cal OES Earthquake and Tsunami Duty Officer (EQTP) are monitoring the situation and will provide updates
- At 0852 hours, the Cal OES EQTP Duty Officer advised that he contacted the California State Geologist and no concerns reported.

12 – Story Residential Building Fire, San Jose, Santa Clara County

On 07/18/16 at 0846 hours the CSWC was notified by the Cal OES Coastal Duty Officer (CDO) of the following:

- A fire occurred in a 12 story building at 235 E. Santa Clara St., displaced 60 people
- The displaced residents are expected to remain unable to return for at least a week while the water damage is repaired and the building undergoes inspection, per the San Jose Fire Department
- Due to electrical lines being cut, fire crews returned to the scene to help residents remove special possessions including electric wheelchairs
- The American Red Cross (ARC) has set up temporary housing at Burnett Middle School, 850 North 2nd Street, San Jose, California 95512, per DPSS last night shelter count: 21
- There have been no request for state assistance at this time

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Low pressure over the Pacific Northwest will open up and become a southwest-northeast aligned trough on Tuesday, then finally move inland late Thursday. Strong high pressure will remain stationary over the Southern Plains during this time. This pattern will produce a moderate to strong southwest flow over Northern California, and through Tuesday the low pressure will have more influence on our weather. A few showers are possible in northern areas today and Tuesday, and there is a slight chance of afternoon thunderstorms across the far northern areas late Tuesday. Any thunderstorms or showers that develop will produce light rainfall, but any lightning that occurs could still be a mix of wet and dry. Southwesterly winds from the higher terrain of the Sierra (5000'+) and east into Northwest Nevada will gust to near 40 mph today and 35 mph on Tuesday. The minimum afternoon RH in those areas will be 10-18%. Temperatures will be 5-10 degrees below normal through Tuesday. Wednesday will be warmer with lighter winds. The trough is expected to move east across Northern California late Thursday and produce more wind across northern and eastern areas. There is a slight chance of thunderstorms in the far north late Thursday as the trough moves through. High pressure will return and produce a warming and drying trend Saturday into the middle of next week. Night and morning northerly surface winds will enhance the warm and dry conditions, but typical summer afternoon upslope winds are expected each day.

SOUTHERN CALIFORNIA

A weak Pacific trough over the West Coast will maintain near to a little below normal temperatures today, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. High pressure over the central part of the country will expand westward bringing a slow warming trend Tuesday through this weekend. Widespread triple digit heat will occur in the valleys starting Thursday. Minimum humidity will be mainly in the teens away from the coastal areas through Wednesday and then there will be more in the way of single digit minimum humidity Thursday through this weekend. Southwest to west afternoon winds of 15 to 25 mph with gusts to 40 mph will surface across the desert slopes and passes through Thursday. There will be northwest to north night winds of 15 to 25 mph with gusts to 40 mph across the mountains of Santa Barbara County eastward to the Grapevine Area as well as over the Tehachapi Mountains Thursday through Saturday.
