"POTENTIAL" Public Safety Power Shutoff (PSPS) Events for Southern California Edison (SCE) and San Diego Gas & Electric (SDG&E)

The California State Warning Center (CSWC) received notifications from Southern California Edison (SCE) and San Diego Gas & Electric advising they have notified customers of a *potential* Public Safety Power Shutoff (PSPS) due to an offshore wind event and critical fire weather conditions. CSWC has made notifications to State and Law Enforcement Agencies.

- The Cal OES State Operations Center is monitoring.

- SCE
  - Per CUEA as of 11/13/18, 0732 hours, there are approximately 25 PSPS outages.
  - SCE continues to monitor existing weather conditions as well as the Woolsey and Hill fires actively burning in the service territory.
  - One circuit is partially proactively de-energized at this time (Anton circuit in Ventura County). Approximately 50 customers are impacted, and all appropriate notifications have been made.
  - On 11/13/18 as of 0906 hours, SCE advised due to changing wind conditions and reports from the field and our meteorologists, Southern California Edison is no longer monitoring 21 circuits across four counties. The list below shows how many circuits remain for monitoring in each of our five impacted counties:
    - Ventura County – 0 circuits remain for monitoring
    - Los Angeles County – 0 circuits remain for monitoring
    - Riverside County – 16 circuits continue to be monitored
    - San Bernardino County – 7 circuits continue to be monitored
    - Orange County – 5 circuits continue to be monitored
  - On 11/12/18, at approximately 2351 hours, SCE pro-actively de-energized a portion of the Energy 16kV out of Chatsworth Substation, de-energizing 35 customers. This circuit was previously identified for monitoring and customers were notified of the potential de-energization event. There were no identified critical care customers on the circuit.
    - Los Angeles, Orange, San Bernardino, Ventura, and Riverside counties have all been notified of identified PSPS circuits and are continuing to receive all associated maps and shapefiles as updates are made.
    - Customer notifications of PSPS de-energization and possible de-energization are ongoing.
    - Customers can find the most updated outage information on https://www.sce.com/wps/portal/home/outage-center or by contacting the SCE Customer Service Center at 1-800-655-4555.

Key Points

11/13/18 - 11/19/18

Tuesday - Wednesday

- A strong Santa Ana wind event will continue across much of the Southern Region. Combined with the very dry conditions, this will lead to very critical fire weather across the area. Winds on Wednesday will be weaker than the Tuesday peak, but critical conditions will persist.

- Winds in the Coastal and Inland Regions will be significantly lighter, but elevated fire weather conditions will persist through the week with very dry relative humidity.

Thursday - Monday

- The Santa Ana winds should largely subside by Thursday, but elevated fire weather conditions will persist through the rest of the week. No precipitation is currently expected through Monday, though relative humidities may finally begin to increase Monday.

All Days

- Widespread poor air quality due to smoke likely to continue.

Inland and Coastal Regions Summary

- Other than occasional breezy conditions, winds should be lighter through the rest of this week; however, conditions will remain very dry with above normal temperatures, so elevated fire weather conditions will persist through the week.

- Widespread poor air quality due to smoke will likely continue through the week.

Southern Region Summary

- Strong Santa Ana winds will continue today.

- **<u>Wind speeds</u>**
  - Sustained winds 20-35 mph with gusts 45-55 mph are generally expected
  - Higher gusts up to 60-75+ mph possible in the mountains and other prone locations
- **<u>Relative Humidity</u>**
  - Extremely dry: 3-10 percent, with poor overnight recoveries

- Critical fire weather conditions will persist into Wednesday, though sustained speeds and gusts will likely be about 10-15 mph weaker than the numbers listed above.

- After winds decrease late Wednesday, elevated fire weather conditions will linger through the week.

Santa Ana Wildfire Threat Index

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

- *** While there will be much lighter winds the rest of the week, conditions will remain unseasonably mild and very dry. ***
- High pressure will continue to produce warm, dry conditions into early next week.
- Widespread light winds across the region over the next 7 days except for somewhat stronger N to E winds developing Saturday night and lasting into Monday.
- No precipitation expected through early next week.
- Afternoon Relative Humidity (RH) will be low (5-15%) most afternoons this week with poor overnight recovery (10-25%) in many areas, particularly mid and upper slopes. Some valley locations that have been very dry may see RH will increase in a few days to afternoon mins of 15-20% and overnight recoveries of 25-35%.
- Afternoon high temperatures will continue 5-10 degrees above seasonal normals with warmest inland areas mostly in the mid 70s. Overnight lows will be pretty close to seasonal values, and overnight frost/freezing conditions are likely to become a bit more widespread.

SOUTHERN CALIFORNIA

- A ridge of high pressure over California will weaken through this weekend. A series of Pacific troughs will move over the West Coast next week.
- Northeast winds of 20 to 40 mph with gusts to 60 mph will continue to surface across much of Southern California this morning. These offshore winds will decrease to 15 to 25 mph with gusts to 40 mph this afternoon through Wednesday afternoon and then there will be only local gusty northeast winds Wednesday evening through Thursday morning. Winds will be light across the region Thursday afternoon through this weekend.
- Widespread single digit minimum humidity will continue through the end of this week and then increase into the teens this weekend. Very poor overnight humidity recovery will continue through Thursday.
- Temperatures will be a little below normal across the mountains today, with upper 40s and 50s and then warm to near normal Wednesday through this weekend.
- Temperatures will be a little above normal in the valleys through this weekend, with 70s to low 80s.
- There will be below normal temperatures along with the possibility of showers next week.
