SITUATION SUMMARY

Oroville Dam Auxiliary Spillway Incident

On 02/12/17 at 1603 hours the California State Warning Center (CSWC) received notification from the Department of Water Resources (DWR) automated line that the Oroville Dam was in failure status due to extreme scouring of the auxiliary spillway. The CSWC are made notifications according to SOP. All down stream warning points were notified.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) as of 02/26/17 at 1000 hours:

- Current releases from Oroville Dam (50,000 cfs) are within the downstream channel capacities in the Feather River.
- Inflows are at 31,000 cfs.
- The current lake elevation is 842.56 feet. As result, no water is flowing over the auxiliary emergency spillway.
- The plan to prevent further erosion utilizes trucks, helicopters, and hand crews to move large rocks and gravel to fill holes in the emergency spillway.

Levee Breach
San Joaquin County
On 02/20/17 at 1945 hours, the California State Warning Center (CSWC) received notification from the National Weather Service advising a levee break occurred on the right bank of the San Joaquin River, San Joaquin County.

- Per the Cal OES Inland Duty Officer (IDO) on 02/25/17:
  - Due to a levee break, there are active flood fighting operations in the area and all residents of rural south Manteca should remain vigilant and alert.
  - The public has been advised to stay off this roadway and avoid the area completely if possible. Heavy equipment and significant truck traffic is expected on Airport Way. Unnecessary vehicle traffic may interfere with the ongoing flood fight operations.
  - Repairs are currently on hold due to material request.
- Reclamation District (RD) 2058: The erosion site was evaluated and it was determined to be an imminent threat.
  - A contractor is mobilizing to the site on 02/26/17 and will start repairs on 02/27/17.
- RD 2064: Approximately 25 boils carrying material covering approximately 1,200 feet were reported.
  - An Engineers Levee Threat Assessment (ELTA) was submitted by MCR Engineering. A Flood Fight Specialist (FFS) and a United States Army Corps Engineer (USACE) representative were deployed to the site.
  - ICT 4 is recommending the RD monitor the site.
- RD 2075: DWR and USACE technical assistance assessed the site and recommended a seepage berm to mitigate the flood threat.
  - Construction began on 02/25/17 and has been completed by placing 1,300 feet of material as of 02/26/17.

Key Points

Overview: A weather system is moving through California today and will keep much of the state cool and moderately unsettled through Monday. Impacts will be minor. Drying period begins on Tuesday and weather will remain dry through the week.

Flooding: Creeks, rivers, streams, some mainstream rivers, reservoirs and the entire water system has been significantly stressed over the past 7-8 weeks. It will take some time before waters decrease enough to no longer be of concern. Roads, hillsides, and steep grades all remain vulnerable to settling with rock and mud slides possible.

Key Hazards

Today -Monday

- **A weak weather system is moving through mainly the northern half of California. Periods of valley rain and mountain snow likely with minor impacts.**

Tuesday-Saturday

- **Dry weather. Streams, creeks, and some mainstream rivers will continue running high. No new weather or water hazards expected at this time.**

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

A cold front will bring gusty winds, low snow levels and moderate to heavy precipitation to the region today and into the tonight. Mountainous and Valley areas will also be impacted with heavy snow showers this afternoon and evening. Snow levels will fall from around 2500 feet early Sunday to around 1500 feet Sunday night, with as much as 4 to 7 inches of new snow possible above these elevations by Monday morning. Lighter snow showers may linger into Tuesday. High pressure will then bring drier conditions with light winds, with cool temperatures through Wednesday followed by a slow warming trend into next weekend.

SOUTHERN CALIFORNIA

A pair of troughs will bring breezy conditions and light precipitation to the region. The first one will reach most of Southern California during the day Sunday. The second system will arrive Sunday night. Both of these systems will focus on Southern California where 1.00 – 1.50 inches of rain may fall on the south-facing aspects. Central California will see 0.50 – 1.00" along the central coast and Sierras. The snow level may dip to 3,500 feet Sunday afternoon and evening and some light accumulations will be possible on I-5 and I-15. West winds of 20-30 mph will be possible in the Sierras and high desert Saturday afternoon and Sunday night. Next week looks drier and warmer with a ridge building over the region by the end of the week. Temperatures will climb into the 70s at lower elevations with light offshore flow possible by next weekend.
