WEATHER OF CONCERN

Weather of Concern

- Strengthening high pressure over California will bring the hottest temperatures of the year to Northern California.
    - Temperatures will exceed 100 in the west side valleys and 90 over the east side as early as today.
    - These warm temperatures will persist at least through the upcoming weekend.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php - Temporarily unavailable.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

*** VERY HOT this week, peaking Tues/Wed ***

*** Isolated thunderstorms possible each afternoon, mainly northern and eastern higher terrain through mid week, possibly more widespread late this week ***

A strong high pressure ridge will remain over the North Ops region through the workweek at least. VERY HOT conditions will be in place with fairly warm overnight lows in most areas as well. The warmest inland valleys will heat to a few degrees either side of 113 Tuesday and Wednesday before decreasing into next weekend. Low RH is also expected with this pattern, so fuels will become even drier then remain very dry as well.

In addition to the heat, isolated afternoon and evening thunderstorms will continue each day, mainly along and east of the Cascade/Sierra crest and occurring further north for the next few days. As the wind flow over the Geographic Area becomes more SE later this week, additional areas of isolated, mainly afternoon and evening thunderstorms will probably develop Thursday and Friday, but that is still somewhat uncertain at this point. Either way, the very hot, dry conditions will favor new starts, emerging holdovers, and support active burning.

Afternoon winds will be driven by local, diurnal patterns that may be a bit stronger than usual due to the strong heating we will be having. Air quality is suffering throughout much of the Geographic Area from smoke production of the region's active fires, and this is also likely to continue to be an issue. The coastal marine layer in the north is a bit thinner than usual under a light offshore wind overnight, but daily afternoon sea breezes will continue.

SOUTHERN CALIFORNIA

There will be little change in the weather today as high pressure remains over Nevada. Isolated afternoon showers and thunderstorms will form over the Sierra Crest and over the mountains and deserts of Southern California east of I-15. Temperatures will be near normal, with 80s to low 90s across the mountains and 90s to 102 in the valleys. Minimum humidity will remain between 12% and 25% above and inland from the 2,000 feet deep marine layer. Moisture will increase bringing scattered afternoon showers and thunderstorms to the mountains and deserts of Southern California starting Monday afternoon. This moisture increase will make it up into Central California starting Tuesday bringing scattered afternoon showers and thunderstorms to the Sierra. Some shower and thunderstorm activity will make it to the coastal and valley locations of Southern California starting Monday afternoon and across Central California starting Tuesday afternoon. The scattered shower and thunderstorm activity will continue through Friday. Temperatures will become 5 to 10 degrees above normal Monday through Friday as high pressure over Nevada becomes strong. Maximum temperatures will be in the mid 80s to mid 90s across the mountains and mid 90s to 108 in the valleys. High pressure will weaken bringing cooling to the region next weekend. The weakening of the high pressure will also cause thunderstorms to become isolated and focused over the mountains and deserts.

Cal OES LAW ENFORCEMENT MISSIONS

Ongoing Cal OES Law Missions

- **2017-LAW-37667, 7/30/17, 0730 hours,** The International Emergency Response Coordination Center (IERCC) reported an In-Reach SOS activation; GPS 37° 44' 38"N by -119° 18' 59.1"W. These coordinates return to Mono County. Mono County Sheriff's Department notified and is responding. R/O advised that her hiking partner is suffering from altitude sickness. **Mission Ongoing**

- **2017-LAW-37675, 07/30/17, 1400 hours,** Yosemite National Parks (YNPS) is requesting resources to locate a 27 year old female who went missing on the morning of 07/17/17 when she separated from her group. M/P reported missing on 07/29/17 at 1300 hrs by hiking partner who was in Truckee. YNPS is request (10) Type I Ground Search and (1) Type III Planning Chief. **Update:** YPNS reported that they located M/P deceased, this information was obtained while LDO was gathering information. **Mission Closed**

- **2017-LAW-35471 4-27-2017, 0900 hours,** Trinity County Sheriff's Office (TCSO) is requesting HRD K-9's to search an area of USFS Land where they believe a homicide subject may be located. The suspect's vehicle was in this area for approximately 50 minutes. They estimated the terrain to be Type II and Type III. Request is for May 27th in the morning. **UPDATE: 7-28-2017, 1057 hours,** re-opened mission. TCSO requested 2 HRD K-9 teams to search a new area of the USFS Land for the remains of a 187 victim. Siskiyou County SO received new information on the case and wanted to re-evaluate the search area. This search will take place on, Monday July 31st . Shasta County SO is responding with their Cadaver search dog team. California Governor's Offices of Emergency Services, Law Enforcement Branch advised. **Mission Ongoing**
