
MODULE 9 - INCIDENT RESOURCES MANAGEMENT TEST

1. List the four principles of resource management discussed in this module.

2. The incident resources management process described in this module consists of the following steps:
(check all that apply)

 Establishing resource needs
 Resource ordering
 Resource use
 Resource demobilization

3. Explain why sound resource planning is essential during the initial stages of an incident.

4. At the incident, the approval to order additional resources belong to the:

 Planning/Intelligence Section Chief
 Incident Commander
 Procurement Unit Leader
 Operations Section Chief
 Logistics Section Chief

5. On very large or prolonged incidents, the resource ordering authority to place orders can be delegated to the: (check all that apply)

- Logistics Section Chief
- Resources Unit Leader
- Supply Unit Leader
- Food Unit Leader
- Planning/Intelligence Section Chief
- Procurement Unit Leader
- Must always remain with the Incident Commander.

6. The Operational Planning Worksheet (ICS 215) is used during the _____ to establish resource needs.

7. Essential information to be included in every resource order will include: (check all that apply)

- Incident name
- Order and/or request number (if known or assigned)
- Date and time of order
- Travel instructions
- Quantity of resources
- Kind and type
- Reporting location (specific)
- Safety message
- Requested arrival time
- Alternate resource choices
- Radio frequency to be used
- Person/title placing request
- Callback phone number or radio designation.

8. The responsibility to fill orders placed from incidents belongs to the:

- Incident Procurement Unit
- Jurisdictional dispatch center
- Agency administrator
- Incident Supply Unit

9. List one reason why multi-point resource ordering may be required.

10. Name the three incident locations where incoming tactical resources will normally be initially assigned.

11. Out-of-service resources not being used during the current operational period are normally assigned to the _____.

12. Single resources must be formed into Task Forces, Strike Teams, Squads or Mobile Field Forces prior to assignment into a Staging Area.

- True
- False

13. The authority to establish, move, or discontinue staging areas rests with the _____.

14. Give two reasons why resources are assigned to staging areas.

15. Task Forces, Strike Teams, Squads or Mobile Field Forces assembled at an incident staging area should always be disassembled: (check two)

- At the end of each Operational Period
- At the completion of the incident
- When placed out-of-service at the Base
- When no longer required.

16. The ICS position responsible for deciding what resources will be kept in the staging area is the:

- Staging Area Manager
- Operations Section Chief (except the Incident Commander)
- Planning/Intelligence Section Chief
- Supply Unit Leader

17. The number of resources in a staging area can change dramatically during an operational period.

- True
- False

18. Setting minimum resource levels for a staging area is the responsibility of the _____.
Keeping status of minimum resource levels at the Staging Area is the responsibility of the _____.

19. When should incident demobilization planning be done?

- At the beginning of the last operational period.
- When requested by the agency dispatch center, DOC or EOC.
- early in the incident.
- when the incident is over and resources are no longer needed.

20. List the five considerations which may influence decisions on the management of incident resources:
