California OES
Weather Threat Briefing

Thursday, January 30, 2020
9:00 AM PST

Day 1 (Thu): Gusty winds will continue across Southern Region today, with the strongest winds (primarily in the mountains and select valleys) capable of blowing over trees and power lines.
**WEATHER KEY POINTS**

**01/30/20 - 02/05/20**

**Thursday-Saturday**
- Gusty north-northeast winds will continue across portions of southern CA through Friday
  - The strongest of these winds will occur Thursday, primarily in the mountains across southern California and select valleys including the Inland Empire, and could be capable of blowing down trees and power lines
  - These winds will create travel difficulties, especially for high profile vehicles
- Weak storm systems will bring rain showers to northern Coastal region Thursday and Saturday, but no significant impacts are expected
- Dry conditions elsewhere across the rest of the state with temperatures warming to above normal for late January and no significant impacts anticipated

**Sunday-Wednesday**
- A storm system will likely move across much of the state Sunday and Monday, bringing a quick shot of significantly colder temperatures and a chance of valley rain and mountain snowfall
  - Gusty north winds are also possible Sunday into Monday, especially in Southern Region
- A warming and drying trend is possible late Monday into Tuesday
